

MONMOUTHSHIRE
CONSERVATORY COMPANY

A local family company specialising in superior
ORANGERIES, CONSERVATORIES, DOORS AND WINDOWS

Momnouthshire Conservatory Company Show-Site

A FAMILY BUSINESS

We are a family business and a local, community driven company. We aim to source, wherever possible, from regional suppliers, fellow local businesses and of course, hire local skilled tradespeople.

Chris Atwell established the company in 2004. He wished to create a model that would deliver superior service and product quality on a personal, homegrown level. Since then, we have expanded, diversified and grown into the brand we are today. In 2012, we relocated from Abergavenny high street to Pengethley Garden Centre in Ross-on-Wye. The move allowed us to centralise ourselves within the three main counties in which we work – Monmouthshire, Herefordshire and Gloucestershire.

Alongside Chris, the company is jointly managed by his son and daughter, Robyn Atwell and Lara Anstee. Over the years, our show-site has expanded and blossomed, boasting fully furnished orangeries and conservatories, doors and windows, as well as numerous greenhouses. Our on-site offices have extended four-fold with our recent expansion, allowing us to continue to reside within this beautiful setting.

We hope you enjoy this brochure, designed and written in house, using only photographs of our own installations. If this inspires you to take the next step, please feel free to pop into our show-site. We are open Monday-Saturday, on hand to help inspire you to create your perfect extension or home improvements.

“The images within this brochure are those of our own installations”

“The Orangery has transformed our home and we frequently receive positive comments on the quality of the build. As a result we would highly recommend Monmouthshire Conservatory Company to anyone looking to improve their home.” *Mr & Mrs Slater*

“Very friendly family run business that is professional and helpful. They worked with us to create the exact look we wanted and it exceeded our expectations. All the workmen were lovely and the quality of their work is brilliant. Would definitely recommend to others. Thank you so much.” *Mr and Mrs Allen*

“Inspirational in their design and build along with fine attention to detail and a solid track record of excellent customer service and after sales support.” *Mr & Mrs Noakes*

The orangerie originated in Italy during the 17th century as an impressive feature within Renaissance Gardens, primarily created to house orange tree's and other exotic vegetation. During this time, glass-making technology had developed dramatically, enabling large expanses of clear glass to be produced. The early orangeries were constructed using pillars made from stone and large panes of glass to let in the maximum amount of natural light. As popularity grew for the desired orangerie, construction became increasingly influenced by architects creating designs to adjoin the home and orangerie structure, resulting in the build we now recognise today.

ORANGERY BUILDING AND DESIGN

Here at Monmouthshire Conservatory Company, we undertake your orangery installation in its entirety, from start to finish. From planning permission and creating your perfect bespoke design, through to removing existing structures, all ground works and full structural installation of your chosen build.

Once the orangery is complete, our team will undertake all necessary rendering and plastering, as well as the appropriate electrics and plumbing. All you need to do is decorate and furnish your new room to flatter your

individual taste and style. Your orangery will be designed specifically to you and your property so it's worth taking the time to consider all the features of your future build. What will be its primary function? What glass to masonry ratio would you prefer? Will the doors span the entire frontage of the build or would you rather a narrower walkway? We will work with you on all of these elements in order to result in the perfect bespoke design, uniquely created for you, in order to reach maximum potential and satisfaction.

This line drawing emphasises the clean finish of our Aluminium Lantern orangery roof system. Slimline frames with large expanses of glass yet robustly strong and durable - the perfect combination.

ORANGERY MATERIAL AND COLOUR CHOICES

Aluminium Orangeries

With the use of strong 40mm box rafters, our Aluminium orangeries boast a slim, elegant roof profile with excellent thermal performance. Extra strong rafters mean the tie bars can be set higher, guaranteeing increased headroom as well as a contemporary, understated finish. Even in large buildings, the roof structure remains remarkably minimal, creating a sense of clear, free space under the eaves.

All Aluminium exterior coloured profiles are quality finished with powder coat paint. This coating can be chosen from any colour within the RAL spectrum, enabling you to personalise your orangery to marry in with the existing colour pallet of your home.

uPVC Orangeries

Our uPVC orangery roof-systems consist of a strong, slim line Aluminium core based structure, capped with uPVC. This capping enables the added choice of decorative gutter fascia and external cornice detailing, creating an attractive, eye-catching finish.

uPVC orangeries can be created in a selection of heritage colours and woodgrain effects, allowing you to choose the perfect finish to compliment your home. Whatever your material choice, style or design, the quality of your orangery will be second to none. Every build comes complete with our ten-year guarantee, for complete peace of mind.

Throughout the Eighteenth Century, it was the fashion amongst young aristocrats to take a Grand Tour of Europe. During their travels, they were often enchanted by the variety of plant life they encountered throughout the Mediterranean. The first glasshouses in Britain were created to provide a protected climate for grape vines and citrus trees, which could not withstand the cold, harsh winters. These glass structures were named 'conservatory' derived from the Italian "conservato" (to store or preserve) and Latin "ory" – a place for.

CONSERVATORY BUILDING AND DESIGN

We create beautiful conservatories that are designed specifically for you and tailored to your individual style and build requirements. We will advise and guide you on every aspect to help you achieve the perfect construction, discussing all phases of your build, including size, style, design, material choice and colour.

Gone are the days when a conservatory was merely for summer use. Our conservatories are created using regulated high performance glass, enabling your conservatory to keep a much more controlled temperature throughout the seasons, thus creating a space to be enjoyed 365 days a year.

Your conservatory is designed uniquely for you and your home so it is worth taking time to consider the exact style of build you require. We will take you step by step through this process, discussing everything from orientation and dimensions to roof system design and material choice. This will enable you to sculpt a conservatory that not only fulfills your practical needs but also looks fantastic.

CONSERVATORY MATERIAL AND COLOUR CHOICES

Aluminium Conservatories

When choosing your conservatory, Aluminium frames, despite being slimmer in style, are much stronger than many comparative materials. This often means that Aluminium is ideal for ambitious extensions where customers are looking to include large expanses of glass. The slimmer finish of Aluminium may also be perfect if you're searching for a sleek minimal design. Powder coating is a process used on Aluminium to create an extensive choice of colour within an almost unlimited spectrum. This facility results in a sophisticated and unique finish, allowing you to truly personalise your conservatory to match your homes existing colour palette.

uPVC Conservatories

Our uPVC conservatory roof-system consist of an Aluminium core based framework, capped with uPVC. Reminiscent of classic, traditional conservatory designs, the modern day uPVC conservatory offers much more than it's predecessors. As technology has developed, uPVC conservatories now offer the highest quality framework in an array of foil-laminated colours. Enabling you to create your conservatory in a complimentary wood grain effect or a selection of flattering colours.

Every conservatory we install comes with our ten-year, insurance backed guarantee, for complete peace of mind.

The front door has always been an architectural statement - the grander the building, the grander the entranceway. During the Victorian era, the front door became a particularly important feature, especially within popular terraced housing. A Victorian door had to deliver the right impression, convey the status of your wealth and help to distinguish your property from others.

With the modern day front door, we primarily seek a secure and sturdy entrance to our home, with the added benefit of optimum energy efficiency. After these boxes are ticked however, what's wrong with creating a little style!

COMPOSITE DOORS

Our composite doors are the perfect choice for creating an impressive entrance to your home. Boasting maximum strength and security, the 48mm thick, cross-bonded, veneered, laminated timber delivers unrivalled stability, providing homeowners with the maximum peace of mind when it comes to the security and durability.

Composite doors offer a wider range of elegant styles with a selection of decorative glass. From country cottage stable doors to art deco elegance, we are sure to have the right front door to compliment your home.

ALUMINIUM DOORS

Since it was first used in homes in the 1980's, Aluminium has dramatically improved in both aesthetics and thermal performance, becoming the slim, strong, contemporary product of choice for many modern-day homeowners.

Your aluminium doors will not only transform your home or building project but will represent an important financial investment. Aluminium looks superb, boasts longevity, value for money, energy efficiency and enhanced security. Our bespoke aluminium doors can be created in any style to suit your property – bi-folding, French and sliding to name but a few. Your doors can be finished in any colour from the RAL colour spectrum.

uPVC DOORS

Not only do our uPVC doors make a fantastic first impression – they have the added benefit of suiting most styles of homes, as well as being practical, secure and energy efficient.

We offer a wide range of bespoke door styles and finishes – from simple glazed designs to more ornate styles, with decorative glass or panelling. As well as the classic white finish, uPVC now comes with the added benefit of foil coating and wood grain effect, in various shades and colours. When it comes to style, these doors can be created specifically to suit your individual preference and property style.

Historically, a window was simply a hole in a wall to let in light. The drawback of this was that it not only let in light but the winter elements and potential intruders. Early “windows” in the Bronze and Iron Ages counteracted these downsides by using wooden shutters and even stretched animal hides, dipped in oils to make them translucent and waterproof. It was not until the invention of glass in the 17th century that windows took on the shape of what we now know today.

WINDOW DESIGN

Windows are a prominent feature within any property and are quite rightly viewed as an opportunity to transform and improve your home. At Monmouthshire Conservatory Company, we can help you to choose the perfect windows for your home. Our team are able to advise on all aspects of design, size, style, material and colour.

In some cases, new windows aren't always feasible. Whether your home is listed or you simply can't bear to part with the original windows. Secondary glazing provides a real alternative to replacement windows, they provide improved sound and energy efficiency whilst maintaining the appearance of your windows.

WINDOW MATERIAL AND COLOUR CHOICES

Aluminium Windows

Improvements in aesthetics and thermal performance has made aluminium a popular choice for many of our customers. Our aluminium window frames are now slimmer and stronger than ever before, allowing more glass within the frame and therefore an abundance of natural light into your home. Clean joints and subtle lines offer an exceptional finish for homeowners in search of a superior quality product.

Our bespoke windows can be created in any style to suit the period of property – casement, inline slider, bifold, bay or Georgian, to name but a few. Your windows can even be created in any colour from the RAL colour spectrum.

uPVC Windows

Our uPVC windows are a clear favourite amongst our customers. uPVC windows are popular not only because they suit most styles of homes, but also because they are practical and of course, energy efficient.

As well as the classic white finish, we offer uPVC windows in a range of foil coated colours and woodgrain effects. When it comes to style, these windows can be created specifically to suit your individual preference and property style. Casement, inline slider, bay and Georgian are just a few of the styles that can be created.

We employ a fully accredited electrician to undertake our electrical installations. Being Napit registered, you can rest assured that our electrical work is completed to the highest possible standard. Our electrician is also available to undertake additional household electrical work. If you would like a quotation, please don't hesitate to contact us.

ELECTRICAL SERVICES

Light Fittings and Electrical Sockets

Your build can come complete with all downlighters, light fittings, switches and electrical sockets, as well as outdoor lighting. We will work closely with you to achieve your desired lighting effects and to have the correct finish on all sockets and switches.

Heating

Many of our customers choose to heat their extensions using electrical radiators. These radiators are low energy and include a built-in thermostat. With that said, we can also run heating from your existing household system or install underfloor heating throughout your build.

“The level of customer service was excellent at all times and nothing was ever too much trouble. The range and quality of their products represents great value for money and deliver outstanding enhancements to any property.” *Mr Carlson*

We are proud to be a **Which Trusted Trader** and being a local, family company, reputation is of the utmost importance to us and to our customers. Here's a few examples of what people had to say:

GREAT

We have gradually had all our doors and windows replaced over the last 18 months. From first to last, the quality of the windows and the service is second to none. The work was done very neatly and everything was left clean and tidy. Nothing was too much trouble for all the members of the team and the after sales service was excellent. Would not hesitate to recommend to anyone. Thank you MCCLtd! *Julia*

BRILLIANT JOB

So pleased with the workmanship from the bricklayers through to the plasterers & electrician. Pleased we went with a local family concern, rather than a large company. Great team in the office. *Alison, Herefordshire*

VERY IMPRESSED

From the first day of quotation to the final inspection, I was very pleased and impressed with quality of work. Highly recommended! *Stuart, Gwent*

EXCELLENT COMPANY

It makes a change to deal with an excellent family business, particularly in this field. Product and the fitting work was done on time as promised, after sales second to none. *Roger, Herefordshire*

A GLEAMING SERVICE

We had complete window and door replacements and from start to finish, Monmouthshire Conservatory Company were very helpful, accommodating and efficient. They were streets ahead of others we considered and we are glad we selected them. From day one the fitters were courteous and inventive in overcoming some unforeseen obstacles. The back up Team were also very supportive and kept everything in check to achieve a successful installation. We would recommend them without hesitation. *Gordon, Ross On Wye*

 "The Monmouthshire Conservatory Company have just finished our new garden room. We are absolutely delighted with the end result. Their reputation for quality and service is well deserved. We would be very happy to recommend to anyone". *Mr MacBean*
