

**MONMOUTHSHIRE**  
CONSERVATORY COMPANY

---

*A local family company specialising in superior*  
ORANGERIES, CONSERVATORIES, DOORS AND WINDOWS

*Monmouthshire Conservatory Company Show-Site*

## A FAMILY BUSINESS

We are a family business and a local, community driven company. Chris Atwell established Monmouthshire Conservatory Company from Abergavenny in 2004. He wished to create a model that would deliver superior service and product quality on a personal, homegrown level. Now we're lucky enough to have moved into second generation, being jointly managed by Chris's son and daughter, Robyn Atwell and Lara Anstee.

Surrounded by our brilliant and skilled team of employees, we source, wherever possible, from regional suppliers, fellow local businesses and of course, work alongside local skilled tradespeople. Drawing from the best in our community enables us to provide you with the highest quality products and service, whilst upholding the honest, reputable reputation we have nurtured over the years.

We hope you enjoy this brochure, designed and written in house, using only photographs of our own installations. If this inspires you to take the next step, please feel free to make an appointment to visit our show-site, complete with fully furnished orangeries, conservatories, doors and windows, as well as numerous greenhouses. We're here to turn your vision into a reality - to assist in making your house the perfect *home* you've always envisaged.

*"The images within this brochure are those of our own installations"*

“The Monmouthshire Conservatory Company have just finished our new garden room. We are absolutely delighted with the end result. Their reputation for quality and service is well deserved. We would be very happy to recommend to anyone.” *Mr MacBean*

“Our vision at the beginning of the build is exactly what we got. Great teamwork, thank you all so much.” *Mrs Brayshaw*

“The orangery has transformed our home and we frequently receive positive comments on the quality of the build. As a result we would highly recommend Monmouthshire Conservatory Company to anyone looking to improve their home.” *Mr & Mrs Slater*

## ORANGERIES

## ORANGERY BUILDING AND DESIGN

Here at Monmouthshire Conservatory Company, we undertake your orangery installation in its entirety, from start to finish. From planning permission and creating your perfect bespoke design, through to removing existing structures, all ground works and full structural installation of your chosen build.

Once the orangery is complete, our team will undertake all necessary render and plastering, as well as the appropriate electrics and plumbing. All you need to do is decorate and furnish your new room to flatter your

individual taste and style. Your orangery will be designed specifically to you and your property so it's worth taking the time to consider all the features of your future build. What will be its primary function? What glass to masonry ratio would you prefer? Will the doors span the entire frontage of the build or would you rather a narrower opening? We will work with you on all of these elements in order to result in the perfect bespoke design, uniquely created for you, in order to reach maximum potential and satisfaction.

*This line drawing emphasises the clean finish of our orangery lantern. Slimline frames with large expanses of glass yet robustly strong and durable - the perfect combination.*

## ORANGERY STYLES, MATERIAL AND COLOUR CHOICES

### Aluminium Orangeries

With the use of strong 40mm box rafters, our Aluminium orangeries boast a slim, elegant roof profile with excellent thermal performance. Extra strong rafters mean the tie bars can be set higher, guaranteeing increased headroom as well as a contemporary, understated finish. Even in large buildings, the roof structure remains remarkably minimal, creating a sense of clear, free space under the eaves.

All Aluminium exterior coloured profiles are quality finished with powder coat paint. This coating can be chosen from any colour within the RAL spectrum, enabling you to personalise your orangery to marry in with the existing colour pallet of your home.

### Traditional Lantern Orangeries

The traditional lantern orangery depicts the classic and original orangery style, whereby a glazed lantern roof light is set into a traditional flat roof, created using timber ceiling joists. The Aluminium lantern is slimline in appearance and brings a stylish ambience to your orangery or extension, whilst maximising the amount of natural light coming into your home.

With the additional benefit of powder coating, these lanterns can be created in an array of colours. Whilst white, anthracite and black come as standard, we can also create all our Aluminium products in almost any profile from the RAL colour spectrum, enabling you to marry your build into the existing colour pallet of your home or alternatively, go for something a bit different!

### uPVC Orangeries

Our uPVC orangery roof-system consist of a strong, slim line Aluminium core based structure, capped with uPVC. This capping enables the added choice of decorative gutter fascia and external cornice detailing, creating an attractive, eye-catching finish.

uPVC orangeries can be created in a selection of heritage colours and woodgrain effects, allowing you to choose the perfect finish to compliment your home. Whatever your material choice, style or design, the quality of your orangery will be second to none. Every build comes complete with our ten-year guarantee, for complete peace of mind.

“Right from the start of our planning/research Monmouth Conservatories have been extremely helpful offering ideas and solutions to create our vision. On site all the staff from builders to electricians have been extremely polite and tidy and have been careful to ensure the guests in our holiday cottage were not disturbed by the building work and the construction area and car park were left clean. The time taken to build the conservatory itself was frustrating... for the right reasons though. As ours is a very old building with no square walls they wanted to ensure a perfect fit! I would have no hesitation in recommending Monmouth Conservatory Company and their excellent staff.” *Mr & Mrs McCord*

## CONSERVATORIES

## CONSERVATORY BUILDING AND DESIGN

We create beautiful conservatories that are designed specifically for you and tailored to your individual style and build requirements. We will advise and guide you on every aspect to help you achieve the perfect construction, discussing all phases of your build, including size, style, design, material choice and colour.

Gone are the days when a conservatory was merely for summer use. Our conservatories are created using regulated high performance glass, enabling your conservatory to keep a much more controlled temperature throughout the seasons, thus creating a space to be enjoyed 365 days a year.

Your conservatory is designed uniquely for you and your home so it is worth taking time to consider the exact style of build you require. We will take you step by step through this process, discussing everything from orientation and dimensions to roof system design and material choice. This will enable you to sculpt a conservatory that not only fulfills your practical needs but also looks fantastic.

## CONSERVATORY MATERIAL AND COLOUR CHOICES

### Aluminium Conservatories

When choosing your conservatory, Aluminium frames, despite being slimmer in style, are much stronger than many comparative materials. This often means that Aluminium is ideal for ambitious extensions where customers are looking to include large expanses of glass. The slimmer finish of Aluminium may also be perfect if you're searching for a sleek minimal design. Powder coating is a process used on Aluminium to create an extensive choice of colour within an almost unlimited spectrum. This facility results in a sophisticated and unique finish, allowing you to truly personalise your conservatory to match your home's existing colour palette.

### Contemporary Conservatories

Our contemporary conservatories offer all the advantages of a modern-day conservatory, with the added benefit of an internal box pelmet. The pelmet can be set with multiple spotlights and even has room for an integrated sound system.

This style of conservatory not only enables you to have integrated lighting but also gives a versatile, sleek and modern feel – perfect if you're trying to move away from the look of a traditional all glass conservatory. Contemporary conservatories can be created in either uPVC or Aluminium, with an array of styles, colours and finishes.

### uPVC Conservatories

Our uPVC conservatory roof-system consist of an Aluminium core based framework, capped with uPVC. Reminiscent of classic, traditional conservatory designs, the modern day uPVC conservatory offers much more than it's predecessors. As technology has developed, uPVC conservatories now offer the highest quality framework in an array of foil-laminated colours. Enabling you to create your conservatory in a complimentary wood grain effect or a selection of flattering colours.

Every conservatory we install comes with our ten-year guarantee, for complete peace of mind.

"Inspirational in their design and build along with fine attention to detail and a solid track record of excellent customer service and after sales support." Mr & Mrs Noakes

## GLAZED EXTENSIONS

## GLAZED EXTENSION BUILDING AND DESIGN

Glazed extensions are becoming ever more popular with our customers. The added benefit of a solid roof and plastered ceiling allows for the addition of light fittings and gives a substantial feel to the build. This married with selected areas of roof glass, gives the perfect natural light input with a warm and cosy feel.

The benefit of lightweight, synthetic roof tiles is that they're light enough to sit on conservatory frames, as well as being extremely thermally efficient and fully compliant with building regulations. Many of our customers also opt for brick, block or stonework finishes to marry in with the existing medium of their property.

*Opposite Page: Synthetic Tiled Roof Glazed Extension with White Aluminium Bifolding Doors. Above Left: Synthetic Tiled Roof Glazed Extension with RAL 8017 Aluminium Bifolding Doors. Top Right: Panelled Glazed Extension with Anthracite Aluminium Windows and Sliding Doors. Bottom Right: Synthetic Tiled Roof with White uPVC Conservatory Frames.*

## GLAZED EXTENSION MATERIAL CHOICES

### Synthetic Tiled Roofs

As with all our builds, the desired finish of your glazed extension is created individually for you and to marry in with your property. Our synthetic roof tiles come in several different colour choices and the glass can be inputted in many different ways, depending on which roof design you choose.

Your tiled roof can sit on conservatory frames or a more substantial stone or brick build, with windows and doors chosen to suit your requirements and property style. For more information on material and colour choices, please see our conservatory, window and door sections.

### Panelled Roofs

Panelled roofs are the first roofing systems designed to allow you to combine interior plastered ceilings with shaped panelled glazing. Internally, similar to our uPVC orangery roof systems, these roofs include a perimeter ceiling pelmet in order to place spotlights and if desired, music speakers.

Externally, the panels are finished in urban grey, blending in with virtually any house style. As with synthetic tiled roofs, your panelled roof can sit on conservatory frames or a more substantial stone or brick build. A contemporary glazed extension with unique style and finish.

## DOORS

## COMPOSITE DOORS

Our composite doors are the perfect choice for creating an impressive entrance to your home. Boasting maximum strength and security, the 48mm thick, cross-bonded, veneered, laminated timber delivers unrivalled stability, providing homeowners with the maximum peace of mind when it comes to security and durability.

Composite doors offer a wider range of elegant styles with a selection of decorative glass. From country cottage stable doors to art deco elegance, we are sure to have the right front door to compliment your home.

"Great staff, great products and great service. What more can we say!" Mr & Mrs Fortey

## ALUMINIUM DOORS

Since it was first used in homes in the 1980's, Aluminium has dramatically improved in both aesthetics and thermal performance, becoming the slim, strong, contemporary product of choice for many modern-day homeowners.

Your aluminium doors will not only transform your home or building project but will represent an important financial investment. Aluminium looks superb, boasts longevity, value for money, energy efficiency and enhanced security. Our bespoke aluminium doors can be created in any style to suit your property – bi-folding, French and sliding to name but a few. Your doors can be finished in any colour from the RAL colour spectrum.

*Opposite Page: Aluminium Sliding Doors in Anthracite. Above Left: Aluminium Sliding Doors in Anthracite. Above Right: Aluminium French Doors in White.*

## uPVC DOORS

Not only do our uPVC doors make a fantastic first impression – they have the added benefit of suiting most styles of homes, as well as being practical, secure and energy efficient.

We offer a wide range of bespoke door styles and finishes – from simple glazed designs to more ornate styles, with decorative glass or panelling. As well as the classic white finish, uPVC now comes with the added benefit of foil coating and wood grain effect, in various shades and colours. When it comes to style, these doors can be created specifically to suit your individual preference and property style.

## WINDOWS

Top Left: uPVC Windows in Rosewood. Bottom Left: uPVC Windows and Panels in White. Above Right: Aluminium Window in White. Opposite Page: Timber Alternative Flush Windows in Agate Grey.

"I am very pleased with my smashing new windows. The weather is Autumnal and I am smug and snug! They are the effect I wanted. Can I say thanks to the office staff and well done to the fitters who worked so hard to get every detail correct. They were a delight to have in my home." *Ms Thomas*

“After spending 20 years painting our old wooden windows we finally made the decision to change to aluminium! It was an anxious time and a big decision to modernise our property which is a mixture of old cottage and new build! However our home now looks smart and tidy again and we are very pleased with the results both aesthetically and practically.” *Mr & Mrs Visser*

## WINDOW DESIGN

Windows are a prominent feature within any property and are quite rightly viewed as an opportunity to transform and improve your property. At Monmouthshire Conservatory Company, we can help you to choose the perfect windows for your home. Our team are able to advise on all aspects of design, size, style, material and colour.

In some cases, new windows aren’t always feasible. Whether your home is listed or you simply can’t bear to part with the original windows. Secondary glazing provides a real alternative to replacement windows, they provide improved sound and energy efficiency whilst maintaining the appearance of your windows.

*Opposite Page: Aluminium Bay Window in White. Above Left: Secondary Glazing in White. Above Right: uPVC Box Sash Windows, Foil Coated in Cream.*

## WINDOW MATERIAL AND COLOUR CHOICES

### Aluminium Windows

Improvements in aesthetics and thermal performance has made aluminium a popular choice for many of our customers. Our aluminium window frames are now slimmer and stronger than ever before, allowing more glass within the frame and therefore an abundance of natural light into your home. Clean joints and subtle lines offer an exceptional finish for homeowners in search of a superior quality product.

Our bespoke windows can be created in any style to suit the period of property – casement, inline slider, bifold, bay or Georgian, to name but a few. Your windows can even be created in any colour from the RAL colour spectrum.

### Timber Alternative Flush Windows

These windows blend specialist knowledge with the finest materials and craftsmanship to realise the ultimate next generation of timber alternative technology. Our windows take design inspiration from the beautiful aesthetics of timber but without the drawbacks of time-consuming maintenance and costly upkeep associated with wooden windows.

Featuring timber look joints, traditional internal timber aesthetics, deep wood-like cills and discreet ventilation, they take the best from the past and create the most advanced A-rated products that help enhance and protect your home now and for years to come.

### uPVC Windows

Our uPVC windows are a clear favourite amongst our customers. uPVC windows are popular not only because they suit most styles of homes, but also because they are practical and of course, energy efficient.

As well as the classic white finish, we offer uPVC windows in a range of foil coated colours and woodgrain effects. When it comes to style, these windows can be created specifically to suit your individual preference and property style. Casement, inline slider, bay and Georgian are just a few of the styles that can be created.

“Our thanks go to you all at Monmouthshire Conservatory Company; we have been very impressed and re-assured by your standard of work, attention to detail and the conscientious attitude of your direct employees and sub-contractors at every stage of this project.” *Dr & Mrs Harwood*

“Our sliding door has brought in much more light and made the garden part of the house.” *Mr & Mrs Watson*

We are proud to be a **Which Trusted Trader**! Being a local, family company, reputation is of the utmost importance to us and to our customers. Here’s a few examples of what our valued customers have to say:

#### FANTASTIC FROM START TO FINISH!

“We chose Monmouthshire Conservatory Company for our new orangerie after visiting their show site and meeting the family run team. From start to finish we have had complete trust and confidence in the company. From the design stage through to completion everyone involved has given great communication and shown a true passion for ensuring that we received exactly what we wanted from our new room. The quality of workmanship is exceptional and we have no hesitation in recommending Monmouthshire Conservatory Company. All this and delivered on budget....perfect!” *5 Star Which? Trusted Trader Review - Customer in South Gloucestershire*

#### EXCELLENT WORK

“We had a new front door fitted by this company, everything went as planned. We would strongly recommend this company as we found them to be very professional and competent. The 2 fitters turned up on time and did a very good job of fitting a front door. They were meticulous in their work and cleaned up when finished. We would have no hesitation in using this Company again.” *5 Star Which? Trusted Trader Review - Chris in Monmouthshire*

#### REPLACEMENT FRENCH DOORS

“Excellent service from my first trip to the showroom to the fitting of the doors. Fitting was undertaken efficiently and to a very high standard. Particularly impressive were the calls from the office to check that everything was going well. The fitters were polite, worked solidly and tidied up afterwards.” *5 Star Which? Trusted Trader Review - Customer in Herefordshire*

#### GOOD JOB WELL DONE

“Supplied & fitted new front door, in short, it’s a good job & well done!” *5 Star Which? Trusted Trader Review - Roy in Gwent*

“The level of customer service was excellent at all times and nothing was ever too much trouble. The range and quality of their products represents great value for money and deliver outstanding enhancements to any property.” *Mr Carlson*
